

INI: Entry TransformControl3D

Syntax

```
[FABonding]  
TransformControl3D=value | value = 0,1
```

```
[VirtualSetup]  
TransformControl3D=value | value = 0,1
```

Description

By value=1, a graphical 3D object navigator will be activated within the [3D view panel](#).

Currently (release 3.2.55) this option is restricted to modules [FA_Bonding 3D](#) for bracket navigation and [V.T.O.3D](#) for crown navigation.

In releases > 3.2.55 the functionality will also be available in module [Aligner 3D](#) for both, crowns and attachments.

The functionality corresponds to the one provided by panel [Bracket navigator](#) resp. [Crown navigator](#) if only one 3D object (bracket, crown) was selected, while the effect of clicking on a button depends on the view direction.

Hint

The INI entry can be ignored for releases > 3.2.55 b/c there the visibility of the InView navigator can be controlled by a separate icon button in each relevant module.
