

System Options - Tab |Interfaces| - Desktop scanners|IOS

In principle, OnyxCeph^{3™} can import scans from any model or intraoral scanner, provided that the prerequisites defined for further processing with regard to file format, data set size, mesh topology and bite relation are met. If the scanner cannot be called or queried via one of the predefined interfaces, the [Simple Image Import Interface](#) should be set up and used for patient-related import.

For the scanners listed below, default settings for scan import can be defined in the system options. The list will be expanded regularly as required.

Interface	System / Software
CS_3X00	Carestream IOS
CADstar	CADstar Desktopscanner
DentalDirect	Dental Direct Desktopscanner
Imetric	Imetric Desktopscanner
CERECortho	Omnicam IOS
SHINING 3D	Shining Desktopscanner / IOS
DOF	DOF Desktopscanner
iTero	iTero Download Import
HeronClinic	Heron IOS
Aliedstar	Aliedstar IOS
Medit Link	Medit Link Integration
smart optics	smartoptics Desktopscanner
orthoX	orthoX Desktopscanner
R+K	R+K Desktopscanner
ZirkonZahn	Zirkonzahn ZZ 300, ZZ 600 Desktopscanner
True Definition	3M IOS
