# System Options - Tab |Email|

On system³ options tab |Email|, account settings for the direct communication with an Email server and for sending email attachments can be configured.

[Click on tab to switch to related topic]

Panel Direct Dispatch

At various situations it is possible to send email messages - both with and without attachments.
Here you can store and test the access data for the email account to be used for the sending type [direct mail] to be used.

Panel Export - Attachment

This specifies settings for sending email attachments:

Entry	Meaning
Directory	Directory for caching file attachments
Fixed file name	Definition of a fixed file attachment name
Password	Password default (can be modified before sending)
Maximum image size	Maximum single image size for file attachments
Execute	Event when filling export directory
