

Ceph Tracing

◀ TP Key Users

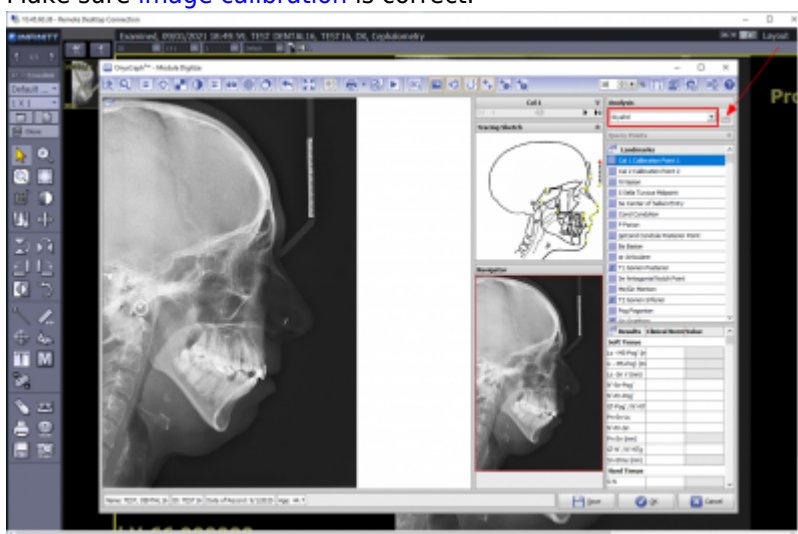

1. Open Tracing Module from Thumbnail

Click on main menu icon [Digitize] to open [tracing module window](#).

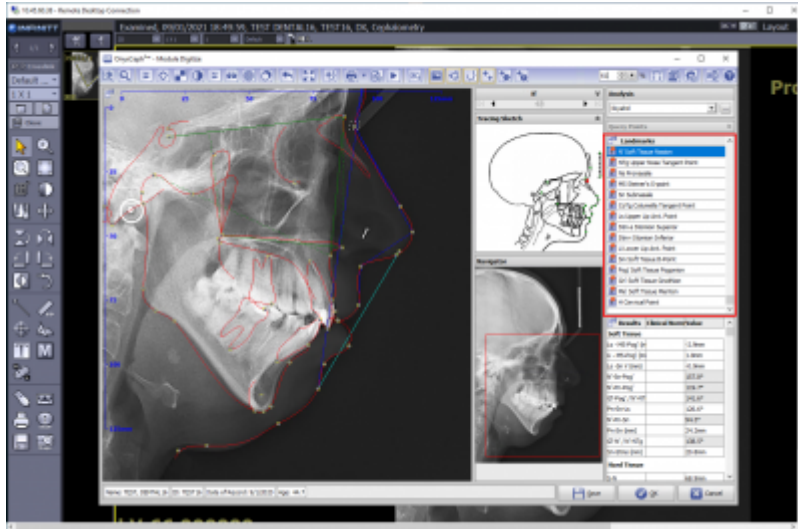

2. Select Analysis

Make sure [only] lateral ceph analysis [Riyahd] is selected - otherwise, [select analysis from Analysis List](#)
 Make sure [image calibration](#) is correct.

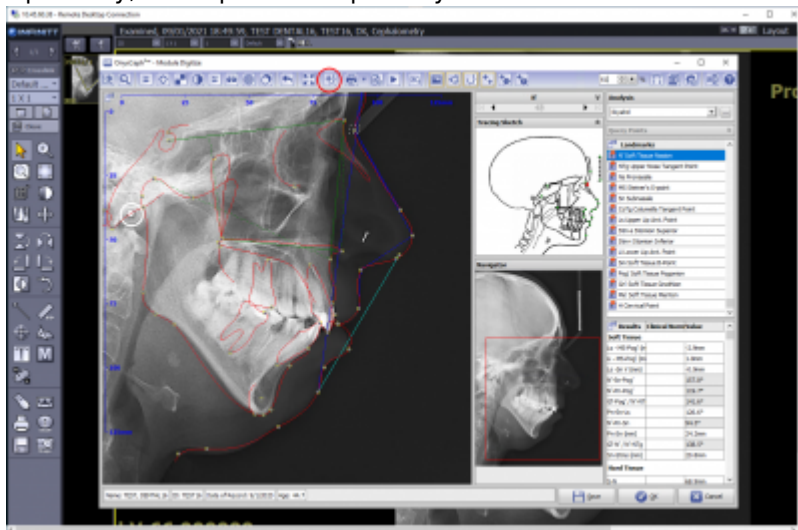

3. Digitize Ceph Landmarks

Digitize landmarks in landmark list by **right clicking** the related position in the image. Correct landmark position by left mouse drag&drop.

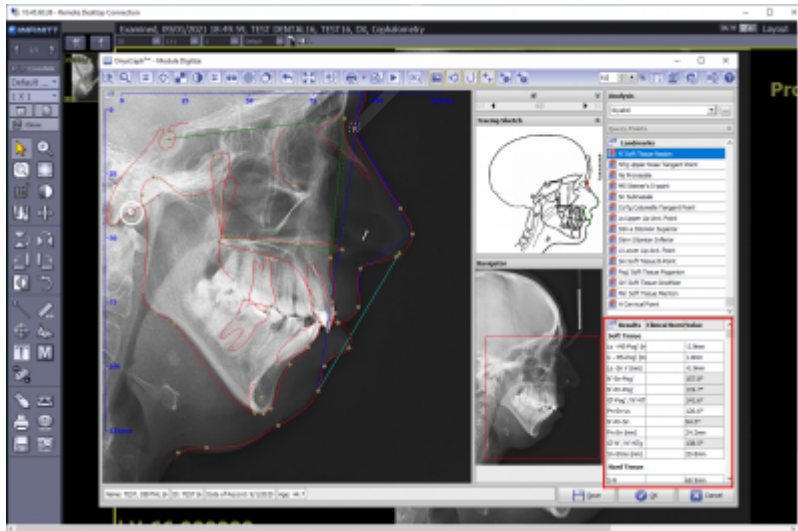

4. Adjust Profile Template

Optionally, adjust profile template by Bezier curve.

5. View Results

View results in [Result List] - open full screen list via context menu.
